**SCOPE OF WORK**

The project will consider eliminating the at-grade crossing of Archer Avenue by two Belt Railway of Chicago (BRC) tracks. This will be accomplished by creating either an overpass or underpass for vehicles using Archer Avenue at this location.

**BENEFITS**

Approximately 18,600 vehicles and 259 CTA buses (#62) pass through the crossing daily. This project will improve air quality by reducing vehicle idling, reduce roadway congestion and improve safety for all road users. The grade crossing separation will eliminate delay to more than 2,700 vehicles daily, resulting in alleviation of nearly 59,600 annual motorist hours of delay. It will also eliminate the potential for collisions between vehicles and trains.

This location is designated a “911 Critical Crossing.” This is a critical location for emergency services to access communities that have a high frequency of train movements or delays. The grade separation will eliminate this issue.
